

To the IUTA ULTRATRIATHLON management

I introduce myself to you of the outgoing Committee and to all the athletes of the ultratriathlon.

I am Fabio Flauti, an Italian athlete, compete in races Ultra since few years. This year I had pneumonia and I could not participate in Bad Blumau for triple and in New Orleans for the deca.

I apply to be part of the future IUTA committee because I believe that this sport has potential for an exponential growth and that the Mediterranean area (where I live) offers great possibilities.

Many are the athletes who do not know about this competitions or who are forced to desist from participating in order to travel expenses because of the great distances to reach the various locations.

With many Italian friends of ultra (Cambio Alberto, Cristian Menghini, Roberto Lendaro and others who support my candidacy) I have various ideas of how to create new chances to be able to exploit and to organize races in those months of the year that in north-central Europe would be impossible for the weather.

All this without, obviously, leaving out anything that was carried out by the current IUTA management.

The capillarity of controls and listening ability of the questions of the athletes and of the race organisers will be at the base of the new management, with transparency and love for the sport but especially for this type of sport and this type of athletes.

Best regard..... I will also improve my English!!!
